TRAC-HER: PUBLIC SAFETY PROGRAM

B22 PARK, INC wants to engineer affordable smart hair, skin and nail accessory devices encrypted with precise GPS positioning and stable global signals to proactively fight against human trafficking on a global level. We will partner with global law enforcement agencies and anti-trafficking organizations to identify, evaluate and recommend public safety improvements to decrease the rates of Human Trafficking on a global level. With our Trac-Her Program, we can proactively fight against predators, including the ability to gather data on criminal patterns and targeted areas.
